

Penn State Web Conference 2006
Using the Penn State Search Engine (and latest updates, 2006)
9:45 - 10:45 Session 1 - Room 206

- Jeff D'Angelo, Systems Analyst/Programmer,ASET/ITS, jcd@psu.edu
- Jeremy Hill, Systems Design Specialist,ASET/ITS, jeeper@psu.edu
- James Leous, Manager/Research Programmer,ASET/ITS, leous@psu.edu

Abstract:

This session will provide an introduction to search engines and Web site enhancements using search features provided by our Google Search Appliance. It will also describe new and changed features provided by the summer 2006 search engine upgrade. We will include information about what Web designers need to change on existing sites. As our information and directions update during the next year, we will also offer this as a Web Developer Luncheon and ITS Training session.

Prerequisite Skills:

This session will begin with the important changes Webmasters must make to existing sites to be compatible with the new Google Search Appliance, followed by an introduction to our new search engine before leading into more advanced topics.

Outline:

- Top 3 Changes Affecting Existing Sites
- How Search Works
- How The New Search Engine Works
- Search Integration into Web Sites
- New Features
